

## Investing in Our Community to Better Meet Your Medical Imaging Needs

1. Remote access to reports and all images in your office or at home.

New IntegradWeb second generation WIS PACS system provides easier operation, faster results and access to current and previous patient studies for side-to-side comparison to give you more data and to allow for more informed clinical decision making .

2. Commitment to customer service.

Upgraded WIS infrastructure with voice recognition dictation, new, upgraded phone system, and a new 2nd-generation PACS system provide easier and faster scheduling, less waiting, more flexible scheduling, faster report creation and delivery - all resulting in better service to you and your patients.

3. Board certified, subspecialty trained radiologists.

WIS radiologists stay on the forefront of their specialty, applying cutting edge imaging technologies and procedures to produce and interpret images that optimize clinical decision-making. All our radiologists remain in contact with each other for consultation, offering the referring clinician the benefit of their combined experience and insight.

4. Electrifying the Eastside while increasing your office productivity and decreasing costs.

WIS is in the early stages of connecting directly to Electronic Medical Records (EMRs). Images and reports are delivered directly into your EMR without a need to scan or digitize them and manually insert them. You can view them faster and at a lower staffing cost.

## Why Washington Imaging Services Is Your Eastside Solution

5. **Serving the Eastside for over 45 years.**

We know community needs. Clinicians have a familiarity and confidence with our WIS radiologists and their skill sets. We will be here for the long-term to serve you. Two local sites provide a short commute from your patient's home or office.

6. **We provide a full spectrum of medical imaging products.**

From our state-of-the-art HI-REZ Siemens PET/CT, to our 2 MDCT's, 4 MRI, 5 Ultrasound and 3 X-Rays systems, we provide a full spectrum of imaging capabilities to meet the needs of our referring clinicians and your patients.

7. **Convenient hours to meet the varied needs of patients and clinicians.**

We have expanded our hours to meet your needs. Easy parking, a friendly staff and comfortable facilities insure your visit to WIS is an enjoyable one.

**Bellevue Hours: 8am-5:30pm Mon-Fri**
