When will I know my results?

One of our board certified radiologists will interpret the images and usually prepare a written report for your referring clinician the same day as your exam. The imaging study done at WIS (Washington Imaging Services) may be only one tool in your clinician's work up - they may need additional time to correlate all of the associated reports and data before they are ready to talk to you. WIS and your referring clinician politely request that you wait for your clinician's office to contact you about the scan results.
